A New Era In Technology Collaboration: Joining Forces For Faster Innovation

#AGCTECH24

AGC
THE CONSTRUCTION
ASSOCIATION

Introduction

Tommy Linstroth
Green Badger Founder & CEO
LEED Fellow

Siavash Mohseni
Hensel Phelps
Senior Innovation Manager

Today's Discussion

- How ConTech innovation is changing
- How Hensel Phelps/DIVERGE has adapted to leverage new opportunities
- What does collaboration with GCs/tech suppliers look like now
- Discuss the growth of CVC in the industry

Components of Strategies

AGC
THE CONSTRUCTION
ASSOCIATION

Prioritizations and Values

Risk Reduction

Safety, Quality Control, Project delays

Productivity Increase

Labor Shortage, do more with less

Cost Savings

Increase margin, reduce cost for our partners

Investment Opportunity

Direct investment or through our LP

Improve Employee Retention

Be part of Hensel Phelps's innovation culture

Strategic Alignment

Alignment with APG and direction of company's innovation

Readiness technologies to be use in an initiative

Availability of Technology

State of solution

Off the shelf
Customized solution
Developed by technology partner
Developed by a start up in Diverge ecosystem

Ease of Implementation

Experience

Previously implemented
Some experience
Brand new process implementation

People

Knowledge

Previously involved
Some knowledge
Brand new to the initiative and innovation

Innovation Identity

	Visionary	Leading Innovator	Fast Follower	Late Adopter
Description	Significant R&D investment to invent new technologies and demonstrate possibilities	Advances newly developed technology before commercial success is found through pilots	Quick to adopt once a technology is proven to be a commercial success	Only adopts once technology is industry-standard and down the maturity and cost curves
Innovation culture	Flexible, start-up culture with a flywheel for innovation and change	Culture of innovation that is quick to adapt novel technologies	Established culture that is open to new ideas	Slow moving to change and adding new capabilities
Capability / Talent	Talent acquired from adjacent industries (e.g. Google / Microsoft and Amazon)	Talent can be poached from	SME groups can be used to assess and implement new technologies	Skilled labour, contractors, or training programs more easily available for implementation
Initiative examples	VDC Software such as issue tracking, AR, MR 2015	Field applications for Daily report, Commissioning 2017	HP – adopted Cloud based PM solutions in 2019	Supply Chain Management, and Supply Chain Management Insight

Is this still the strategy moving forward?

The Ultimate Guide LEED v4 and v4.1 Construction for General Contractors

**MRc5: Construction
Waste Management**

**SSp1: Construction Activity
Pollution Prevention**

**LEED Materials &
Resources Credits**

**IEQc2: Low
Emitting Materials**

**IEQc3: Construction
IAQ Management Plan**

**IEQc4: Indoor Air
Quality Assessment**

Green Badger | LEED Resources

The Ultimate Guide to LEED v4 and v4.1 Construction Credits for General Contractors

The most comprehensive educational resource for general contractors, filled with practical guidance on how to achieve LEED construction credits.

It's essential for project teams to opt into LEED v4.1 for all the BPDO credits and for Low Emitting Materials. It may or may not be useful for Construction Waste Management, and won't make a difference for Construction Activity Pollution prevention or Indoor air quality management.

Suggested Remediation Items

	Item	Remediations
SEC	SEC1 - How do you securely operate your workload? SEC5 - How do you protect your network resources? SEC6 - How do you protect your compute resources?	<ul style="list-style-type: none">- Implement / modify core AWS security services<ul style="list-style-type: none">- CloudTrail<ul style="list-style-type: none">- Configure a multi-region Trail- Configure Data Events- Configure log file validation- Configure KMS encryption- Security Hub<ul style="list-style-type: none">- Configure reporting using a suitable framework- Configure EBS Default Encryption- Encrypt existing EBS volumes- Build a segregated public + private VPC structure<ul style="list-style-type: none">- Multi-AZ- Public routes through IGW- Private routes through NAT GWs- Implement Secrets Manager for application-consumable secrets
REL	REL2 - How do you plan your network topology? REL9 - How do you back up data?	<ul style="list-style-type: none">- Implement and configure AWS Backup for optimal RPO + RTO targets- Separate monolithic network structures into Public + Private subnet groups

Strong IT Security Program

- Focus on security early
- Document efforts in an easily distributable format
- Establish a Trust Center to validate
- Utilize free resources to improve performance
