# ABOUT TILSON

- Recognized 14 consecutive years on the Inc. 5000 list, one of the most prestigious rankings for the nation's fastest-growing private companies
- Organically grown construction consulting and telecommunications services firm designing, engineering, permitting and constructing fiber and wireless telecommunications network infrastructure
- 1,400+ employees in more than 20 locations, 60+ construction consultants with 30+ in contingent workforce
- Nationwide licensed professional engineer, nationwide licensed telecom contractor, and electrician in many states
- Average CIT professional has spent 15 years in construction and applications

ASSOCIATION

# AUGMENTED ANALYTICS

## The Challenge

- GC hired to develop a new technology park in Silicon Valley.
- Oracle's Primavera P6 is the traditional CPM scheduling tool. However, P6 doesn't let users explore the impact of alternative scenarios on the time and cost of a construction project easily.
- GC deployed an AI model to investigate schedule alternatives.

## The Solution

- AI removed the constraints that were hard coded within the P6 schedule and let the model generate the most efficient scenarios.
- Attractive execution options are surfaced that the contractor wouldn't have had time to surface on their own given how long it takes to create schedules with traditional methods.

## The Result

- With AI, this GC was able to accelerate its schedule for the project by 45 days (8%) while reducing crew sizes by 10%. The crew savings alone was worth millions.

# ADVANCED DATA VISUALIZATION

## The Challenge

- GC brought in a new CFO and additional PE funding to grow through acquisition.
- Existing analytical tools did not provide the high-level indicators needed to correlate actuals back to the corporate strategy or intuitive explanations of what story the data was telling.
- GC had already partially deployed the Microsoft Power Platform throughout the business.

## The Solution

- The financial analytics platform was revamped through fresh KPI discoveries and redefined data models.
- The new models were used to create dynamic visuals within Power BI that not only support the drill-through to actuals but provide the storytelling required to tie back to the corporate strategy.

## The Result

- GC can prepare business unit review meetings in half of the previous timeframe. The alignment of all stakeholders to a shared vision of the financial health of the company allows them to pursue additional acquisition targets much more aggressively.

# DIGITAL TWIN

## The Best Targets

- Quality Control
- Safety
- Productivity and Performance

## Minimum Digital Capabilities

- IoT Sensors & Devices
- BIM
- Data Integration Platform
- Cloud Computing
- Data Analytics/Visualization
- Network Infrastructure
- Cybersecurity
- API/Interoperability

## Where Efforts Should be Focused

- Information Pipelines (from Site to Dashboard)
- Data Transformation Points
- Information Life Cycle
- External Factors (i.e. Weather, Material Economics)
- Deviation Capture and Incorporation

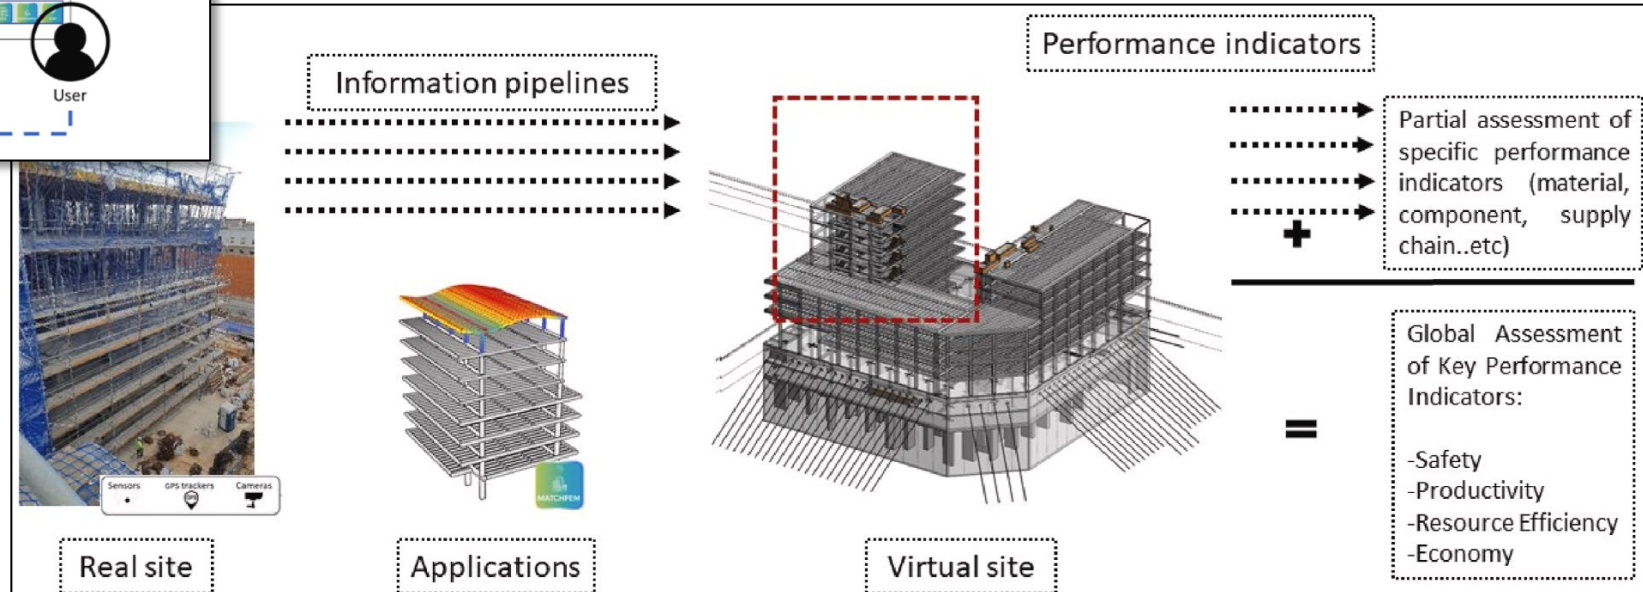

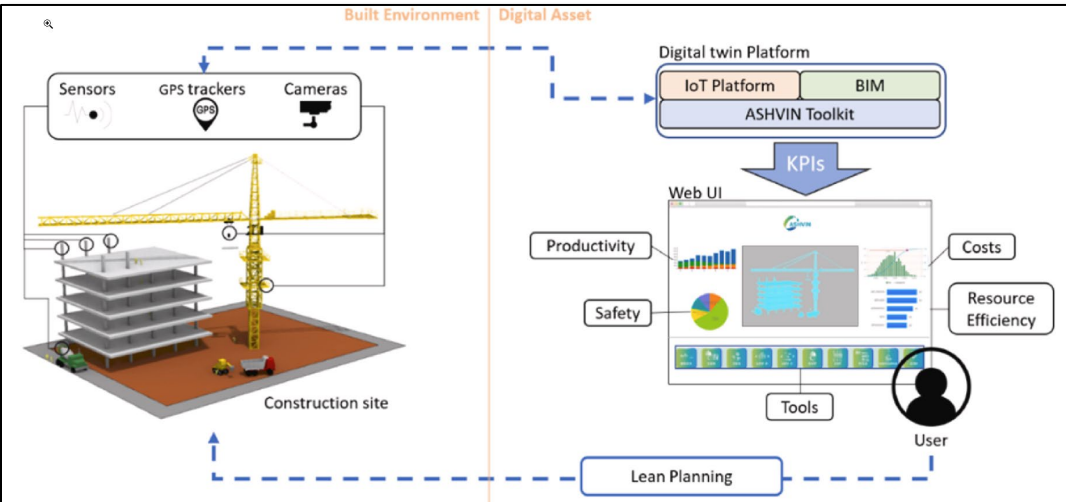

## The Top 5 Challenges

- Technical Readiness of Crew
- Remote Locations
- Priority
- Privacy Concerns
- Time Constraints

# KEY TECHNOLOGIES DRIVING BI AND ANALYTICS

**AGC**  
THE CONSTRUCTION  
ASSOCIATION

# KEY TECH FOR 2024

## Where Investment \$\$ are Going

- Big Data and BI
- Internet of Things (IoT)
- Artificial Intelligence (AI) and Machine Learning (ML)
- Cloud Computing

### MQ at a glance

- Shift towards conversational / Gen AI
- No change in vendor mix
- Biggest advance is Pyramid (again)
- Biggest decline is Sisense (again)
- Oracle joins leaders!
- AWS, SAP close to leaders

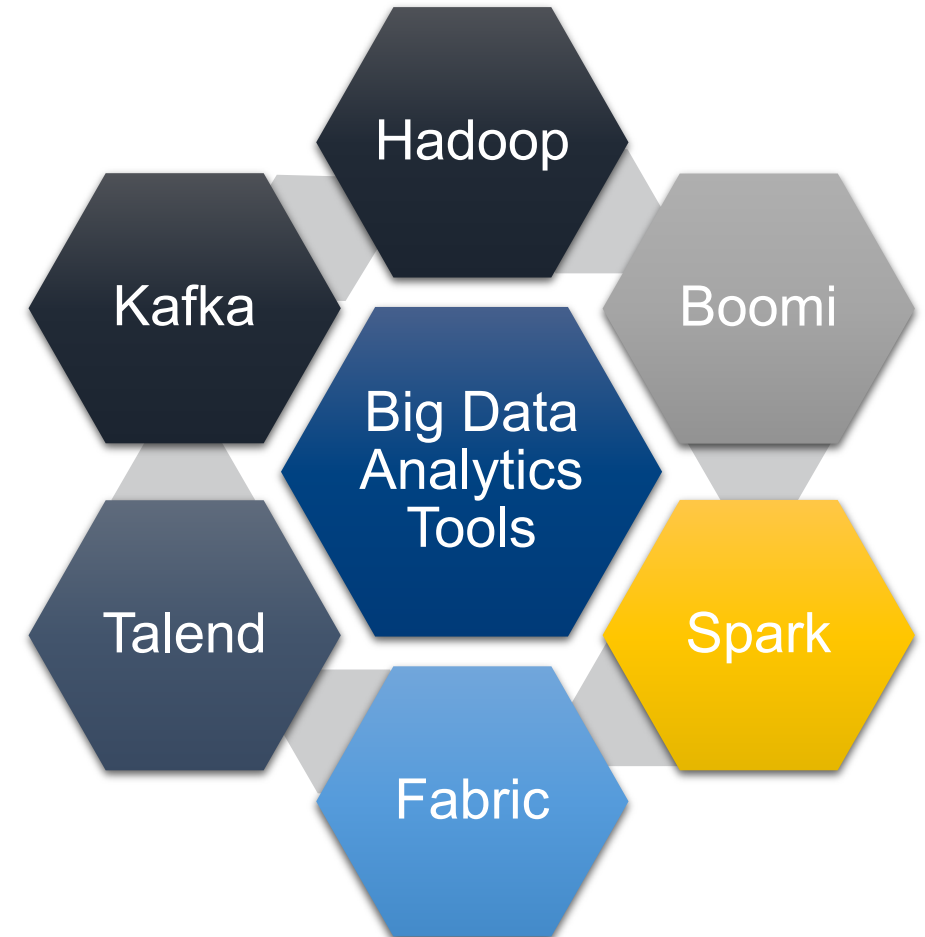

**AGC**  
THE CONSTRUCTION  
ASSOCIATION

# KEY TECH FOR 2024

## Big Data Toolsets

- **Talend:** Software Integration Platform
- **Kafka:** Distributed event store and stream-processing platform
- **Hadoop:** Framework that is used to store/process large datasets
- **Boomi:** Integration Platform as a Service
- **Spark:** Unified Analytics Engine
- **Fabric:** Unified SaaS Analytics Platform

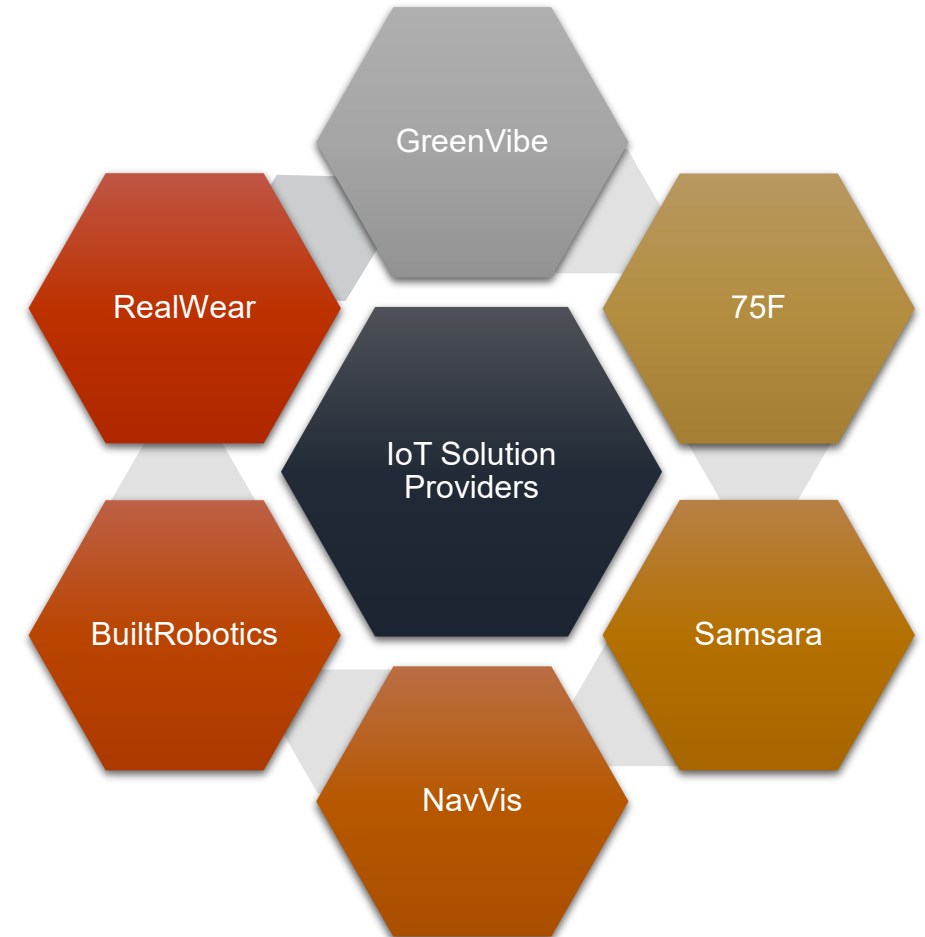

**AGC**  
THE CONSTRUCTION  
ASSOCIATION

# KEY TECH FOR 2024

## IoT Vendors

- **GreenVibe**: Concrete Condition Sensing
- **75F**: IoT-based automation for building systems like HVAC and lighting
- **Samsara**: Video-Based Safety, Telematics, Equipment Monitoring
- **NavVis**: Laser Scanning and Reality Capture
- **BuiltRobotics**: AI-Powered Tools for Utility-Scale Solar Construction
- **RealWear**: AI-voice-powered Smart Glasses

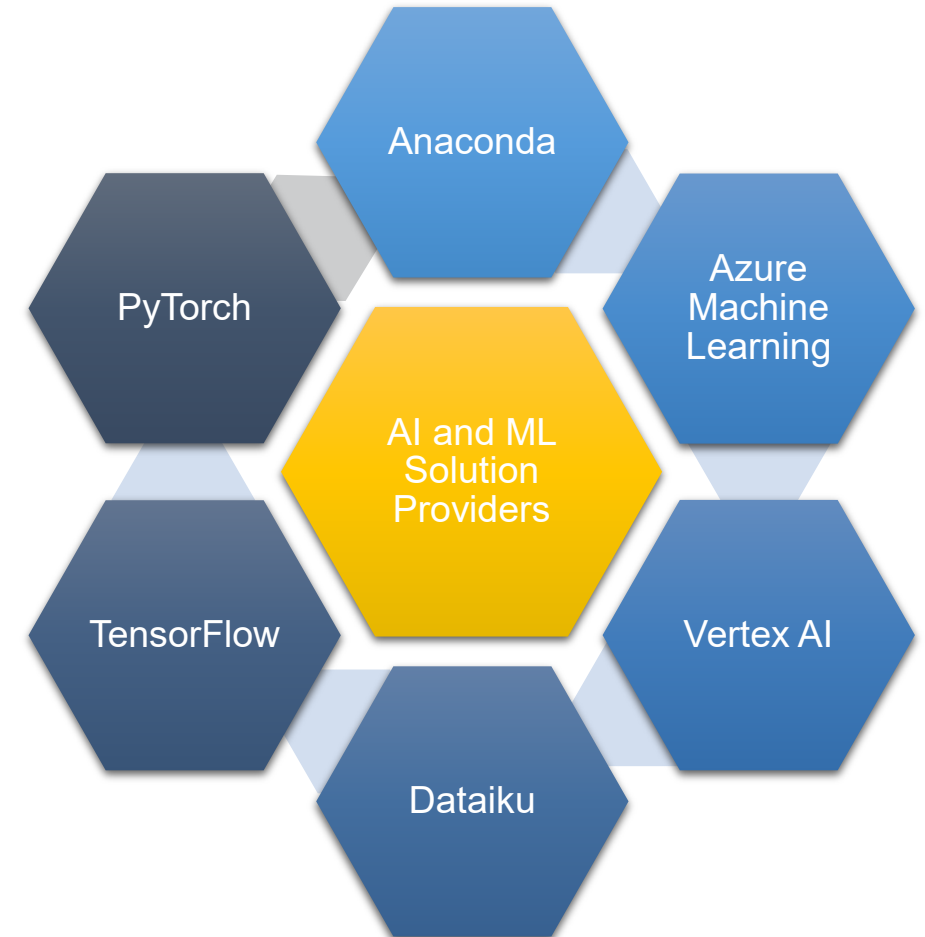

**AGC**  
THE CONSTRUCTION  
ASSOCIATION

# KEY TECH FOR 2024

## AI and ML Solutions

- **Anaconda Enterprise:** Build, deploy, secure Python AI and Data Science solutions
- **Azure Machine Learning:** Cloud service to build/deploy ML. Can also ingest opensource models (like TensorFlow and PyTorch)
- **Vertex AI:** Google's unified AI development platform for building and using generative AI
- **Dataiku:** Tailored offerings for AI & ML, Data Analytics and Enterprise AI. Partners with AWS, Google, Microsoft and Snowflake
- **TensorFlow:** End-to-end opensource machine learning platform
- **PyTorch:** Framework for building learning models

# STRATEGIES AND BEST PRACTICES

TECHNOL

# DATA STRATEGY

## START

- The data you already have

## EMBED

- Core principles of compliant data governance

## MAXIMIZE

- Data usability through standardization

## COMMUNICATE

- Early and often with stakeholders

## PARTITION

- The effort by the business domain rather than the governance stack

## Balance Offense and Defense

### • Offense (Flexibility)

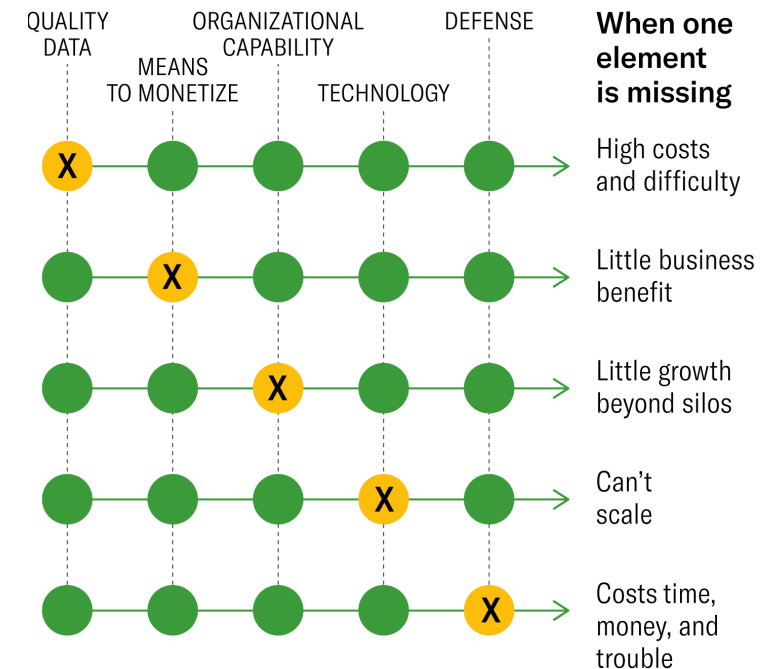

- Identify, compile and inventory data supporting business objectives
- Generate insights around customer and/or market data
- Identify and compile data utilization metrics

### • Defense (Control)

- Ensure regulatory compliance
- Limit fraud and theft
- Enforce data quality
- Drive to a “single source of truth” that can be presented as multiple versions

## 5 Essential Elements for Succeeding with Data

And what happens when one element is missing.

ASSOCIATION

# PREDICTIONS

## Adoption of Tier 1 (Basic) Analytics (via KPMG)

- 45% of Companies already implemented
- 45% of Companies are in the process of adoption
- 68% of Companies are planning Tier 2

# 2026

~15% Adoption Growth in Tier 1  
~ 6% Tier 2 Growth

## Will Kansas City Do it Again?

- Over/Under of 11.5 wins
- Odds to advance to postseason are -500
- Odds to win Superbowl are +600

# NO
